TOPIC: Machine Safety—The Six S's

Overview

As a machine operator, your goal in any emergency should be to complete these six S's:

1. Stop The Machine
First, stop your machine as quickly and safely as possible.
2. Shift To Neutral
3. Set The Parking Brake
4. Shut Down The Engine
5. Summon Help
Call the service technician and describe the problem.
6. Stay In The Cab
Usually you should stay in the cab until help arrives. This is especially true if there's a chance of a potential hazard around the truck that you can't see. However, if there's a threat to your safety in the cab, you should find the safest, fastest exit.
